To the Mayor, Aldermen and Members of
Aberystwyth Borough Council.

PREFACE

I have pleasure in presenting the Annual Report of the Public Health Department for the year which ended on the 31 December, 1967.

The number of live births registered during 1967 was one hundred and four, representing a decrease of thirty two from the figure for the previous year. There were three registered still-births, and one baby died during the first week of life. No woman died as a result of pregnancy, childbirth or abortion.

The number of registered deaths was one hundred and fifty three, a decrease of seven from the figure for the previous year. Forty nine people died of heart disease, thirty four of cancer and thirty two of 'stroke'.

There was a minor epidemic of measles during 1967. Four new cases of tuberculosis were notified and one person died of the disease. In order to trace all contacts of a notified case of tuberculosis the Department works in conjunction with the local chest physician.

A more detailed account of the work of the Public Health Department, including a portion by the Chief Public Health Inspector, will be found in the following pages.

At Faer, Henaduriaid ac Aelodau o
Gyngor Bwrdeisdref Aberystwyth.

RHAGAIR

Pleser imi yw cyflwyno Adroddiad Blynyddol yr Adran Iechyd
Cyhoeddus am y flwyddyn a orffenodd ar 31 Rhagfyr, 1967

Cafodd cant a phedwar a anwyd yn fyw eu cofrestru yn ystod
y flwyddyn, yn cynrychioli lleihad o dri deg dau ar 1966. Cof-
restrwyd dri yn farw-anedig, a bu un baban farw cyn cyrraedd un-
wythnos oed. Ni bu farw un fenyw am ei bod yn feichiog, nac wrth
eni plentyn neu wrth erthylu.

Cofrestrwyd cant-pump-deg-tri o farwolaethau, lleihad o
saith ar y rhif am y flwyddyn cynt. Bu farw pedwar-deg-naw o
glefyd y galon, tri-deg-pedwar o'r cancr a thri-deg-dau o'r strôc.

Bu haint fach o'r frech goch yn ystody flwyddyn. Nodwyd
pedwar digwyddiad newydd o'r ddarfodedigaeth, a bu farw un person
o'r clefyd yma. Er mwyn dod o hyd i bersonnau sydd mewn perygl
o gael y darfodedigaeth oherwydd iddynt fod mewn cyffyrddiad union-
gyrchol a'r achosion a hysbyswyd y mae'r Adran mewn cysylltiad
cyson a'r meddyg sy'n arbenigo ar y darfodedigaeth.

Rhoddir cyfrif manylach o waith yr Adran Iechyd Cyhoeddus,
yn cynnwys rhan a baratowyd gan y Prif Archwiliwr Iechyd Cyhoeddus,
yn y tudalennau canlynol.

VITAL STATISTICS

									<u>1965</u>	<u>1966</u>	<u>1967</u>
1.	<u>LIVEBIRTHS</u>

Ditches and watercourses	3
Visits re. long-stay immigrants	9
Visits to Fairs and Showgrounds	10
Visits re noise abatement	3
Visits not classified	34

- - - - -

WATER SUPPLY

Quality

The water supply is obtained from the Cardiganshire Water Board and the quality throughout the year was satisfactory.

Quantity

There was no water shortage during the summer months despite the considerable increase in population which arose from summer visitors and the increase in the number of students at the University College.

Samples

Sample results were as follows :-

Number of samples taken	=	180
"Satisfactory"	=	179
"Insufficiently chlorinated"	=	1

The 1 unsatisfactory sample was retaken immediately and proved to be satisfactory.

Plumbo-solvency

The considerable use of copper and plastic pipes in building work has almost eliminated the use of lead pipes.

Contamination

There has been no evidence of contamination throughout the year.

Supply to dwellings

	<u>Dwellings</u>	<u>Persons</u>
Mains supply direct to dwellings	3,152	10,200

- - - - -

MILK AND DAIRIES REGULATIONS

There are 33 registered distributors as follows :-

Milk roundmen only	..	22
Milk shops	11

The bulk of the milk supply in the Borough is obtained from one wholesale dairy situated outside the Borough. The milk is delivered daily in refrigerated vans and then distributed by retailer roundsmen. This supply is pasteurised and regular samples are taken. A small quantity is untreated farm bottled milk.

Brucella abortus

5 samples were taken from suppliers of raw milk and submitted to the Public Health Laboratory at Carmarthen for examination. 4 were satisfactory and 1 gave an unsatisfactory initial reaction but further testing proved that this sample also was satisfactory.

FOOD AND DRUGS ACT, 1955

Food inspection

Food premises have been inspected and considerable quantities of food inspected both on the premises and at the office. The quantity of food varies considerably, but it is greater during the summer months when the catering business expands.

Condemnations

Fresh and canned meat products	2,072 lbs.
Fish, wet	356 lbs.
Canned and Miscellaneous condemned	3,689 lbs.
		<u>6,117 lbs.</u>

Disposal of condemned foodstuffs

Tin cans are punctured and buried at the refuse tip; other goods are destroyed by incineration, but this method is limited as the number of solid fuel boilers is decreasing and no special incinerator is available for the process.

Food Hygiene (General) Regulations 1969

Number of premises	141
Number of premises fitted to comply with Reg. 16		141
Number of premises to which Reg. 19 applies	..	141
Number of premises fitted to comply with Reg. 19		138
Number of exemptions granted	3
Premises inspected and re-inspected	82
Preliminary Notices served to remedy conditions		4
Verbal notices to attend to matters	21
Preliminary Notices complied	4

Poultry Inspection

One small producer processing turkeys for six months in the year has recently commenced business in the Borough. Inspection has been on the 'spotter' principle whereby all birds which were graded in class B by the producer were inspected the following day, and condemnation was mainly due to extensive bruising and visceral neoplasms.

Plans have been submitted for the extension of this plant in order to provide a turnover of approximately 1,000 prepacked frozen birds per week.

(i)	number of poultry processing premises within the district	1
(ii)	number of visits to these premises	42
(iii)	total number of birds processed during the year	1700
(iv)	types of birds processed - e.g. turkeys, hens, ducks, broilers, capons, etc.	Turkeys
(v)	percentage of birds rejected as unfit for human consumption	$\frac{1}{2}\%$ approx.
(vi)	weight of poultry condemned as unfit for human consumption	2380 lbs.

ICE - CREAM

There are forty-four registered distributors in the Borough, most of these selling nationally known products in pre-packed form. There are two concerns making ice-cream for consumption on the premises or elsewhere, and there has been a tendency towards soft ice-cream in consumable wafers or cones.

28 samples were taken with the following results :-

Grade 1	=	26
Grade 2	=	2

The majority of samples were soft ice-cream.

- - - - -

INTERNATIONAL HEALTH

The International Sanitary Regulations, (World Health Regulations No. 2) to which Great Britain is a signatory power, require the certification of international vaccination and inoculation documents for persons living within the Borough and proceeding to overseas destinations. 223 certificates were authenticated in the prescribed manner for this purpose.

Stocks of Cholera and Smallpox Certificates are maintained in the Department and can be authenticated at any time in an emergency.

- - - - -

FACTORIES ACT, 1937 - 1961

There are 66 factories registered in the Borough, 62 are power operated and 4 non-power. Responsibility for the supervision of power operated factories is vested in the Ministry of Labour and National Service, except for the provision of sanitary accommodation. In the non-power factories the Local Authority is responsible for matters concerned with cleanliness, overcrowding, temperature, ventilation, drainage of floors and sanitation.

The Factory Inspector of the Ministry notifies the existence of building operations and works of engineering construction in order that the Council may enforce the requirements of Section 7 of the Act, relating to sanitary conveniences on those sites or places

of work, and in this connection 2 communications were received.

During the year one outworker was notified to this Authority and the necessary inspection was made. (See Appendix 1).

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

The brief table below is an indication of the number of premises so far registered and the inspections which have been started. Many matters and contraventions appear which need persistent pressure to remedy.

Premises registered

Offices	97
Retail Shops	144
Wholesale/Warehouses	10
Catering establishments	36
Fuel storage depots	5
Total	<u>292</u>

Persons employed

Males	694
Females	952
	<u>1,646</u>
General Visits	45
Notices served	2
Notices complied	4
Accidents investigated	5

Close contact is maintained and periodic meetings are held with the Deputy Inspector of Factories for Wales, Cardiff, and matters of common interest discussed and settled concerning this rather complicated Act which covers many borderline responsibilities.

- - - - -

REFUSE COLLECTION AND DISPOSAL

Refuse collection, together with other salvage and disposal, is under the control of the Borough Surveyor. Domestic and trade refuse are normally collected once weekly, but in certain cases more frequent collections are arranged.

The refuse is tipped at Felinymor, and soil from the site is used for covering.

- - - - -

LICENSED VICTUALLING AND CLUBS

It has been the practice in the Borough to prepare a report of all Licensed Premises annually. This report is presented to the Licensing Justices who insist as a condition of the license that any defects found must be remedied within a time limit specified by them.

This has resulted in a very high standard being achieved in all licensed premises in the Borough.

- - - - -

HOUSING

Only one private dwelling was constructed. Ten new Council dwellings were completed. The housing demand shows an increase on the previous year from 316 to a total of 340 applications. As will be seen in the table below about 80% of these were in respect of couples or those with one child. This figure is nearly constant.

There were 110 new applications compared with 84 in the previous year, and arising from these, accommodation is required for 193 persons.

Some 33 new lettings were effected from the Housing List, accommodation being provided for 95 persons. Transfers were arranged for 16 families, amounting to 57 persons, in pursuance of the maximum use of housing accommodation. In addition 1 mutual exchange involving 2 persons was effected. Thus 154 persons in all were provided with housing accommodation during the year.

Applicants with:	0	1	2	3	4 or more children
Total	169	91	56	15	9
Percentage of total	49.7	26.8	16.5	4.4	2.6

From the table below it will be seen that the requirements for two bedroom dwellings at 76% show a slight decrease.

As at 1st January	1965	1966	1967	1968
2 bm: dwellings	80.6%	76.2%	80.1%	76.5%
3 bm: dwellings	13.4%	16.7%	13.6%	16.5%
4 bm: dwellings	6.0%	7.1%	6.3%	7.0%

The outstanding shortage of accommodation has been for elderly persons requiring one or two bedroom accommodation, particularly in the twon area, as the more hilly parts of Penparcau are considered to be difficult by many elderly persons.

PESTS ACT 1949

	Type of Property	
	Non-Agricultural	Agricultural
1 Number of Properties	4,132	3
2 (a) Total properties inspected following notification	483	0
(b) Number infested by :-		
(i) Rats	273	0
(ii) Mice	210	0
3 (a) Total number of properties inspected for reasons other than notification	424	0
(b) Number infested by :-		
(i) Rats	2	0
(ii) Mice	15	0

The table above includes the result of 11 block inspections which have covered a considerable part of the town in addition to the routine complaint and infestation work.

The sewers were treated once during the year and each manhole was inspected, pre-baited and poisoned. There does not appear to be any major sewer or surface infestation in the Borough, but there is still evidence of minor infestations, more particularly in the older

parts of the town. It would appear that the constant work in this respect is responsible for the reasonably satisfactory condition.

There are 380 manholes known to exist and a record is kept in respect of each one.

Disinfestation - Vermin

Treatment was carried out in 14 business and domestic premises for infestation by fleas, beetles and ants. Charges were made and advice was given where necessary.

- - - - -

DISINFECTION

A disinfection was carried out in 5 cases for infectious diseases. The steam disinfector owned by the Council is sited in the Council Yard. Equipment is available for use in an emergency.

- - - - -

COMMON LODGING HOUSES

During the year the one remaining Common Lodging House, which was rarely used, was demolished and the site cleared.

- - - - -

LIQUID EGG PASTEURISATION. REGULATION 63

There are no pasteurising plants for this commodity in the Borough.

SWIMMING BATH AND PADDLING POOL

The only swimming bath in the Borough is owned by the University College of Wales, Aberystwyth, and its use is restricted to students, College staff and families, and during term time this facility is extended to cover pupils of the local Grammar School, Secondary Modern School and the College of Further Education. The standard of maintenance and cleanliness is very high.

The Council owns a paddling pool on the promenade and this is mechanically filled with sea water and emptied by gravity. The pool is very popular with children and refilled daily with sea-water which is chlorinated.

During the season 35 samples were taken, and if a result indicated that extra chlorination was necessary, the water was changed immediately. Continual sampling guaranteed a safe pool for young children.

- - - - -

SEWERAGE AND SEWERAGE DISPOSAL

The sewage disposal arrangements for the Borough are reasonably adequate.

During the year Antaron Avenue and Penyranchor areas were connected to the sewerage system.

Twenty one dwellings are not connected to the public sewers, because of impracticability.

The co-operation of the Aberaeron Rural District Council which permits its special vehicle to empty cesspools in the Borough on a repayment basis is acknowledged and it provides a very necessary facility.

APPENDIX I

PREScribed PARTICULARS ON THE ADMINISTRATION

OF THE FACTORIES ACTS 1937-1961

Part I of the Act

Inspections for purposes of provisions as to health
(including inspections made by the Public Health Inspectors).
